"Don't Say Underwear, Say Munsingwear"

MUNSING WEAR

When the name Munsingwear is mentioned in connection with underwear, there is immediately established a feeling of confidence and security. The question of quality, of fit, of serviceability, can be safely dismissed, and the attention centered solely on the selection of the proper size, style and fabric.

Munsingwear is made in both form-fitting knitted and loose-fitting woven fabrics for men, women and children.

The flawlessness of glass

in the crystal sphere that enabled the Seeress of Endor to predict the downfall of that great Kingdom is not a lost art, for in "Chippendale" Krys-Tol, the modern lover of those pure white, crystal qualities in glassware finds a combination of exclusive designing, scintillating brilliancy and extraordinary stability.

DIANA wore Sandals as a protection for her feet, not as a means of adornment.

Modern women wear shoes for protection but they also demand shoes that fit snugly and make trim ankles and trig feet.

Rice & Hutchins' shoes serve in this dual capacity—they protect and make comely feet. The Wanamaker Stores sell them.

MANUFACTURERS OF

CURLED HAIR

Hair Cloth Weaving and Brush Hair

Office and Factory: PIERCE and ORTHODOX STREETS
FRANKFORD, PHILADELPHIA, PENNA.

The largest Importers of South American horse hair in America. The hair is clipped from the tails and manes of healthy live horses; it is washed, boiled, sterilized and curled. Curling transforms it into a mass of springs, making it very resilient. The air circulates through it, making it clean and wholesome. Sterilizing the hair makes it *sanitary*, and every pound we distribute to the dealers is so warranted. Ask them for Gordon's Horse Hair when you want a mattress or pad.

We are also weavers of hair cloth of every kind used by tailors and clothing manufacturers, any width or weave.

The CHENEY

THE MASTER INSTRUMENT

With the Violin Resonator and Orchestral Chambers

Regular and Art Console Models
$125 *to* $625

So unusual is the design and craftsmanship in The Cheney that it stands altogether apart from the usual conception of a phonograph.

It is a masterpiece of fine furniture—and as a phonograph, it marks an evolution in the reproduction of music.

The Cheney embodies the greatest improvements ever made in the recreation of tone quality. Needle scratch is practically eliminated, and "The Longer You Play It, The Sweeter It Grows."

ALMANAC··1922

A common year of 365 days; being the second after Leap Year, and until the 4th of July, the 146th of American Independence.

Containing the rising, setting and eclipses of the Sun and Moon; the phases and places of the Moon; the aspects of the planets; the rising, setting and southing of the most conspicuous planets and fixed stars; the equation of time, and the tides.

NOTE TO THE READER.—The calculations in this Almanac are given for Philadelphia in local or mean solar time when not otherwise expressed, the risings and settings of the Sun and Moon being for the upper limb, corrected for parallax and refraction. To change to Standard Time four minutes are to be subtracted for every degree of longitude the place is east of one of the Standard Meridians, and four minutes added for every degree west of the same.

ECLIPSES, 1922

In the year 1922 there will be two Eclipses, both of the Sun.

I. An Annular Eclipse of the Sun, March 28. Visible to Florida, the West Indies, Central America, Europe, western Asia, and South America and Africa with the exception of the southern portions. The path of annulus crosses the northern parts of South America and Africa.

II. A Total Eclipse of the Sun, September 21. Invisible to the United States. Visible to Australia, the southern portions of Asia, and the eastern part of Africa. The path of totality crosses the central part of Australia.

DISTANCES OF THE STARS

The distances of the Stars are so enormous that it is very difficult to determine them exactly. The parallax by which the distance is determined, has, however, been measured for a few of the brighter stars, subject to a small percentage of error. As a result it is found that in the case of Alpha Centauri which we know is the one nearest us, it would take light travelling at the rate of 186,000 miles a second, about 4½ years to reach the Earth from this star; in the case of Sirius, about 8½ years; and in that of Vega, which passes near our zenith, about 20 years.

If the Stars were not so distant that their diameters dwindle to a point, their size could be determined directly. Many of them, however, are known to be much larger than the Sun. In the case of the variable star Algol, the diameter, and so the size, have been approximately determined by special methods. This star has been found to have a diameter of over 1,000,000 miles which would make its volume nearly twice that of our own Sun.

Quite recently, however, Professor Albert A. Michelson of Clark University, Worcester, Mass., startled the scientific world by announcing to the American Physical Society, meeting in Chicago, that he had perfected a device and had figured the diameter of Alpha Orionis, or Betelgeux, one of our most distant stars. The diameter of this greatest of luminaries is 260,000,000 miles, a little more than 300 times that of our Sun, and nearly as large as the orbit of the planet Mars. Or in other words, Betelgeux is 37,000,000 times as great as our Sun.

Compared with these dimensions, the bodies in our solar system seem most insignificant and stimulate the mental conception of other celestial bodies, which may be even greater in magnitude, and which are so far distant, as to be invisible to our most powerful telescopes.

Were Betelgeux placed as near to us as our Sun, its brilliant surface would fill the entire visible heavens, and its heat would, in all probability, consume the Earth instantly.

The distance from us is so enormous, however, that when you look at the star, the light which strikes your eye, started on its journey from its source about 150 years ago.

"The New Year comes to us unclothed;
And, straightway, thereupon
We hang the cares and troubles of
The days that now are gone.
We crown it with vexations, which
Make every hair turn gray;
We clog its dancing footsteps, as
We take its Youth away.
And when, in spite of struggles, we
Have got it clothed at last,
It's just the Second Childhood of
The Old Year that is past."

—London Sketch.

A woman's opinion of a new man acquaintance is exactly the same as a man's opinion of the New Year. It is not so much an opinion as a query: "How will it all end?"

The Birth Stone for January is the Garnet.

"My father and my mother wove
An earthly coat
For me,
When the sweet note
In February's throat
Trilled from each tree,
When through the breeze
Fell flakes of snow,
And far below,
Upon their knees
Beside a stream half thawed
Did snowdrops blow.
My soul came shyly and adventuring,
What time my father and my mother wove
That coat for me,
In February.
And so explains my love
For thee
February!"

—Anne F. Brown.

There are two freedoms—the false, where a man is free to do what he likes; the true, where a man is free to do what he ought.

—Charles Kingsley.

A SAVING IN COAL

Here is important information to every householder who burns coal in his cellar:

With coal doubling and tripling in price, one of the greatest savings that can be effected in its use for domestic purposes is the conservation of that heat which is lost through uncovered furnaces and cellar pipes.

Instead of a warm cellar and rooms oft-times chilly, the heat can be insulated within pipes and boiler and sent through the house, where it is needed, by using the proper pipe and boiler covering.

For an ordinary-sized house, whether heated by steam, hot water or hot air, the cost of covering these surfaces will be offset in two seasons, and occasionally in a single season, by the money saved in coal. Consult us.

The Virtue of Discrimination

He who knows others is intelligent; he who understands himself is enlightened; he who is able to conquer others has force, but he who is able to control himself is mighty. He who appreciates contentment is wealthy.

He who dares to act has nerve; if he can maintain his position he will endure, but he, who dying does not perish, is immortal.

—LAOTZUS TAO.

The Birth Stone for March is the Bloodstone.

"In every April wind that sings
Down lanes that make the heart rejoice
Yea, in the word the wood thrush brings,
I hear Thy voice.

Lo! every tulip is a cup
To hold Thy morning's brimming wine;
Drink, O my soul, the wonder up—
Is it not Thine?"

—TOWNE.

"A tide of beauty with returning May
Floods the fair city; from warm pavements fume
Odors endeared; down avenues in bloom
The chestnut-trees with phallic spires are gay.
Over the terrace flows the thronged café;
The boulevards are streams of hurrying sound;
And through the streets, like veins when they abound,
The lust for pleasure throbs itself away."

—SEEGER.

We, here in America, hold in our hands the hope of the world, the fate of the coming years; and shame and disgrace will be ours if in our eyes the light of high resolve is dimmed, if we trail in the dust the golden hopes of men.

—ROOSEVELT.

"Love you not the tall trees spreading wide their branches,
Cooling with their green shade the sunny days of June?
Love you not the little bird lost among the leaflets,
Dreamily repeating a quaint, brief tune?"

—Tertius van Dyke.

Man's bounden duty is everywhere and in all things to forward the progress of humanity. The supreme virtue is sacrifice —to think, work, fight, suffer, where our lot lies, not for ourselves but others, for the victory of good over evil.

—Mazzini.

The Birth Stone for June is the Agate.

"—my breast
Burns with the lust for splendors unrevealed,
Stars of midsummer, clouds out of the west,
Pallid horizons, winds that valley and field
Laden with joy, be ye my refuge still!
What though distress and poverty assail!
Though other voices chide, yours never will.
The grace of a blue sky can never fail."

—SEEGER.

"The man who has learned to take things as they come, and to let go as they depart, has mastered one of the arts of cheerful and contented living."

The Birth Stone for July is the Ruby.

"The leaves that carpet the woodland,
The great brown oaks overhead,
The open burrs and the acorns,
The gold and blotches of red;
And all on the fields and roadsides,
The aster and goldenrod,
And some people call it Autumn
And some people call it God."

"The bee hath ceased its winging
To flowers at early morn;
The birds have ceased their singing;
Sheaf'd is the golden corn;
The harvest now is gather'd,
Protected from the clime;
The leaves are sear'd and wither'd,
That late shown in their prime."

—Ouseley.

The horse chestnut is said to have derived its name from the fact that where the leaf stem of the tree breaks from the twig is a miniature horseshoe, exact even to the nail marks. Another explanation given is that the people of Eastern countries use the fruit as medicine for their horses.

The Birth Stone for October is the Opal.

"When November's night comes down
With a dark and sudden frown,
Like belated traveler chill
Hurrying o'er the tawny hill,—
Higher, higher
Heap the pine-cones in a pyre!
Where's a better friend than fire?"

—Robert Johnson.

"Whether you are making love, playing baseball or making money, do your best."

"There was a joyous hostler
Who knelt on Christmas morn
Beside the radiant manger
Wherein his Lord was born.

His heart was full of laughter
His soul was full of bliss
When Jesus, on His Mother's lap,
Gave him His hand to kiss.

Unbar your heart this evening
And keep no stranger out,
Take from your soul's great portal
The barrier of doubt.

To humble folk and weary
Give hearty welcoming,
Your breast shall be tomorrow
The cradle of a King."

The 10 and 14K Line that Sells

There must be a reason for the above statement. *There* is and *here* it is.

We make it honestly, and are satisfied with a legitimate profit. We place it before you through honest merchants, who stand by the goods they sell, producing millions of satisfied users.

THERMOS

Serves you right—food or drink—hot without fire; cold without ice.

Thermos is the original temperature-retaining vessel. It has been awarded the Grand Prize at every International Exposition since its invention,—proof positive of its unquestioned superiority. More than ten million Thermos vessels are in use throughout the world by motorists, yachtsmen, travelers, explorers, hunters, fishermen, picnickers, office workers and in lunch kits by children at school and working men at the factory—a valued servant wherever man eats or drinks.

BOTTLES, FOOD JARS, CARAFES, JUGS, WATER SERVICE (illustrated), LUNCH KITS, MOTOR RESTAURANTS.

But be sure it is the real original Thermos, with the trade-mark stamped on every piece!

Observe good faith and justice toward all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct; and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt that, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it? Can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas! is it rendered impossible by its vices?

POSTAL INFORMATION

DOMESTIC MAIL MATTER

CLASSIFICATION AND RATES OF POSTAGE

DOMESTIC MAIL MATTER includes mail addressed for local delivery, or for transmission from one place to another within the United States, or to or from or between the possessions of the United States, and to that for transmission to or from the United States or its possessions and officers or members of crews of United States naval vessels, to or from the United States postal agency at Shanghai, China, to or from the United States Expeditionary Forces in Europe, and other places where the United States mail service is in operation, and to officers and men of the United States Navy in the United States Naval Hospital at Yokohama, Japan, and is divided into four classes: First, Second, Third, Fourth (Parcel Post).

Domestic rates and conditions, with certain exceptions, apply to mail addressed to Canada, Cuba, Mexico, and the Republic of Panama.

First-Class Matter

includes hand or typewritten matter and carbon and letterpress copies thereof, namely: Letters, postal cards, post cards (private mailing cards) and all matter wholly or partly in writing, whether sealed or unsealed (except manuscript copy accompanying proof-sheets or corrected proof-sheets of the same and the writing authorized by law on matter of other classes). Also matter sealed or otherwise closed against inspection.

RATES OF POSTAGE.—Letters and other first-class matter, 2 cents for each ounce or fraction thereof. Post cards and postal cards, 1 cent each.

"DROP LETTERS."—Two cents an ounce or fraction thereof when mailed at letter-carrier post offices, including offices where village delivery service by carrier has been established, or at offices which are not letter-carrier offices if rural free delivery has been established and the persons addressed are served by rural carrier; and 1 cent for each ounce or fraction thereof when mailed at offices where letter-carrier service is not established, or at offices where the patrons are not served by rural carriers. There is no drop rate on mail other than letters. When any persons or concerns of any city or place send their letters in bulk for mailing for local delivery at a post office in another place where the 1-cent drop-letter rate is applicable, such letters are not drop letters and are not entitled to the 1-cent drop-letter rate, but are subject to postage at the rate of 2 cents an ounce or fraction thereof.

Letters mailed at a post office for delivery to patrons thereof by star-route carrier and those deposited in boxes along a star or rural route are subject to postage at the rate of 2 cents an ounce or fraction thereof.

AEROPLANE MAIL, consisting of first-class matter, including sealed packages not exceeding 30 inches in length and girth combined, is chargeable with postage at the rate of 2 cents for each ounce or fraction thereof. Special aeroplane stamps are not required, but any stamps good for postage may be used.

THE LIMIT OF WEIGHT of first-class matter is the same as for fourth-class matter.

Second-Class Matter

includes newspapers and periodicals bearing notice of entry as second-class matter. No limit of weight is prescribed.

RATE OF POSTAGE.—Newspapers and periodical publications of the second class, when sent unsealed by others than the publisher or a news agent, 1 cent for each 4 ounces or fraction thereof, on each separately addressed copy or package of unaddressed copies. To be entitled to this rate the copies must be complete. Incomplete copies are subject to the third or fourth-class rate, according to their character.

ADDITIONS TO SECOND-CLASS MATTER.—On the wrapper, or the matter itself there may be written or printed (1) the name and address of the sender, preceded by the word "from"; (2) the name and address of the person to whom sent; (3) the words "sample copy," or "marked copy," or both, as the case may be.

On the matter itself the sender may place all that is permitted on the wrapper;

correct typographical errors in the text; designate by marks, not by words, a word or passage in the text to which it is desired to call attention.

Other writing will subject the package to the first-class rate.

PERIODICAL PUBLICATIONS NOT DESIRED.—Publications which are not desired may be refused and not removed from the post office, or they may be returned to, the postmaster indorsed "Refused." The Post Office Department does not determine questions regarding the liability of a subscriber for the subscription price of a publication.

A subscriber to a publication should promptly notify the publisher of any change in his address.

Third-Class Matter

embraces circulars, newspapers, and periodicals not admitted to the second class, nor embraced in the term "book," miscellaneous printed matter on paper not having the nature of an actual personal correspondence, proof-sheets, corrected proof-sheets, and manuscript copy accompanying the same, and matter in point print or raised characters used by the blind. Books are included in fourth-class mail, as are also parcels of miscellaneous printed matter weighing more than 4 pounds.

Matter produced by the photographic process (including blue prints) is printed matter. Matter printed on material other than paper is fourth class.

CIRCULARS.—A circular is a printed letter sent in identical terms to several persons. It may bear a written, typewritten, or hand-stamped date, name, and address of person addressed and of the sender, and corrections of mere typographical errors. When a name (except that of the addressee or sender), date (other than that of the circular), or anything else is handwritten or typewritten in the body of a circular for any other reason than to correct a genuine typographical error, the circular is subject to postage at the first-class (letter) rate whether sealed or unsealed.

Reproductions or imitations of handwriting and typewriting obtained by means of the printing press, neostyle, multigraph, or similar mechanical process, will be treated as third-class matter, provided they are mailed at the post office or other depository, designated by the postmaster in a minimum number of 20 identical unsealed copies. If mailed elsewhere or in less quantity they will be subject to the first-class rate.

THE RATE OF POSTAGE on unsealed third-class matter is 1 cent for each 2 ounces or fraction thereof on each individually addressed piece or package.

THE LIMIT OF WEIGHT of third-class matter is 4 pounds. Parcels of printed matter weighing more than 4 pounds which do not exceed the limit of weight and size for fourth-class matter come within that class and are mailable at the parcel-post rates.

Fourth-Class Matter (Domestic Parcel Post)

embraces that known as domestic parcel-post mail and includes merchandise, farm and factory products, seeds, cuttings, bulbs, roots, scions, and plants, hooks (including catalogues), miscellaneous printed matter weighing more than 4 pounds, and all other mailable matter not embraced in the first, second, and third classes.

EXTENT AND USEFULNESS OF PARCEL POST.—The domestic parcel post offers a convenient, quick, and efficient means of transporting mailable parcels to any post office in the United States or its possessions. The service reaches more places than any other transportation agency. It brings producers and consumers into closer contact, thus opening the way to reducing the high cost of living. Special treatment and advantages are accorded to shipments of farm products. Low postage rates based on the service rendered are provided. The rates to nearby zones are particularly advantageous. Parcels may be insured against loss and may be sent C. O. D.

RATES OF POSTAGE—TO BE FULLY PREPAID—UNSEALED—are as follows:

(*a*) Parcels weighing 4 ounces or less, except books, seeds, plants, etc., 1 cent for each ounce or fraction thereof, any distance.

(*b*) Parcels weighing 8 ounces or less containing books, seeds, cuttings, bulbs, roots, scions, and plants, 1 cent for each 2 ounces or fraction thereof, regardless of distance.

(*c*) Parcels weighing more than 8 ounces containing books, seeds, plants, etc., parcels of miscellaneous printed matter weighing more than 4 pounds, and all other parcels of fourth-class matter weighing more than 4 ounces are chargeable, according to distance or zone, at the pound rates shown in the following table (except as provided in paragraph (*d*), a fraction of a pound being computed as a full pound:

(*d*) Parcels subject to the pound rates, mailed for delivery within the first or second zone, are, when the distance by the shortest regular mail route from the office of origin to the office of delivery is 300 miles or more, chargeable with postage at the rate of 6 cents for the first pound and 2 cents for each additional pound, a fraction of a pound being computed as a full pound.

The local rate applies to parcels mailed under the following conditions:

(1) At any post office for local delivery at such office:

(2) At any city letter-carrier office, or at any point within its delivery limits, for delivery by carriers from that office;

(3) At any post office from which a rural route starts, for delivery on such route, or when mailed at any point on a rural route for delivery at any other point thereon, or at the office from which the route starts, or for delivery on any other rural route starting from the same office;

(4) On all fruits and vegetables mailed at a post office from which a motor vehicle truck route or country motor express route starts, or at any point or post office on such route, for transportation over the route and delivery at any other point or post office on the same route.

WAR STAMP TAX ON FOURTH-CLASS (PARCEL POST) MAIL.—Under the war revenue act of October 3, 1917, parcels transported from one point in the United States to another by parcel post, on which the postage amounts to 25 cents or more, are subject to a war stamp tax of 1 cent for each postage charge of 25 cents or fractional part of 25 cents.

Internal-revenue stamps for use in paying such tax may be purchased from postmasters.

THE LIMIT OF WEIGHT of fourth-class matter is 70 pounds for parcels mailed for delivery within the first, second, and third zones, and 50 pounds for all other zones, including Manila, P. I., but parcels for other places in those islands may not exceed 20 pounds. For limit of weight for parcels sent to or from United States Expeditionary Forces in Europe, inquire of postmaster.

LIMIT OF SIZE.—Parcels may not exceed 84 inches in length and girth combined. In measuring a parcel the greatest distance in a straight line between the ends (but not around the parcel) is taken as its length, while the distance around the parcel at its thickest part is taken as its girth. For example, a parcel 35 inches long, 10 inches wide, and 5 inches high measures 65 inches in length and girth combined.

CURIOUS WILLS

A paragraph, says the London Queen, has been going the rounds of the papers lately to the effect that a man has bequeathed his wife a shilling to buy a rope with, and the cynic may perchance come to the conclusion that all was not well with that family. Be that as it may, however, bequests which betoken strife in the household are not entirely unknown, though perhaps more frequently recorded in the days that are gone than in our own times. For instance, a Kentish man in 1691 bequeathed his three undutiful daughters a shilling apiece, and another left three half-pence to a son for the purchase of a rope for his wife, to be used as soon as possible. Another gentleman in 1785, who had evidently led a troubled life, left £50 to "Elizabeth, whom through my foolish fondness I made my wife, without regard to family, fame or fortune, and who in return has not spared most unjustly to accuse me of every crime regarding human nature, save highway robbery." While yet another unhappy husband in the seventeenth century bequeathed his wife £1,000, "not being able to leave her more by reason of her extravagancy in all things." It will thus be seen that human nature is strong even in death, and that family troubles extend even beyond the grave to point a moral and adorn a tale.

ABOUT THE STARS

"Whenever a mortal falls in sin,
Tears fall from the angels' eyes,
And that is why at times there falls
Bright stars from out of the skies."

Many stars in Winter indicate frost.

Two stars close together, near the moon, are a sign of fire.

To see the Great Dipper on your first glance at the sky means that your cup of joy will soon be full.

When the stars are so thick that there is no space between them for your finger tips, it will rain next day.

If a star seems to move, wish and you will get what you wish for.

When the stars flicker in a dark background rain or snow will follow.

The beautiful stars that shine the brightest belong to those whom God especially loves.

Comets signify earthquakes, wars, changing of kingdoms or great dearths of corn.

If you see a star fall across the sky, count quickly before it disappears, and as many numbers as you can count, so many years will you be able to see clearly.

"When beggars die there are no comets seen—
The heavens themselves blaze forth the death of princes."

THE DESTRUCTION OF RATS

To clear outbuildings of rats, fill a saucer of a flower-pot with oatmeal and place it on the ground against a wall, and lay a board three or four feet long (on its side on the ground and leaning against the wall) over it, so as to form a tunnel or conduit along which rats could run, but poultry would not venture to enter. The rats will soon eat the meal. Then add to the meal a little plaster of Paris in gradually increasing quantities over a period of two or three weeks until you have a mixture of half and half. In preparing the bait be very careful to wear gloves and to mix with a spoon; do not inspect the bait oftener than necessary, and only touch the board with the end of a stick. The dead rats will be found in a petrified condition.

GOING TOO FAR

A famous, but somewhat incompetent orchestral conductor was in the habit of being rude—as conductors can be—to the players in his band, during rehearsal, though he was as mild, on the night of the show, as he was bitter on other occasions. Meanwhile, he was a very bad conductor, though he may have been a good trainer. One afternoon, he kept nagging and swearing at the first violin about his tone and *timbre*, or whatever it is called. The poor violinist was getting more and more exasperated, yet couldn't dare "answer back." Finally, when the conductor said something about the fiddler

knowing less about violins than coal-heavers knew about clocks, the violinist put down his instrument and exclaimed: "Now look here, sir; you're going too far with your personal remarks, and if you're not careful, I shall follow your beat!"

QUITE ALL RIGHT!

A very nervous, and incidentally a short-sighted, man went to one of those strange shops possessed by every town where all kinds of mysterious instruments and implements are sold. He wished to purchase something that would enable him to read his morning paper with greater ease and comfort. But he was very nervous, and had a habit of getting mixed up in what he wanted to say, and of never quite saying the thing in which he was mixed up. So he approached the salesman and, full of nervy shyness, said: "Have you any signifying glasses?" The salesman, for the moment confounded, said, "Signifying glasses? Signifying? I'm afraid we haven't anything that answers to that. Perhaps you could——" But the nervous customer lost all his self-possession and strolled out of the shop muttering: "Oh, well! Quite all right. Sorry; but it doesn't magnify."

HOW TO ADDRESS A PERSON OF RANK

Queen or King: "To the Queen's (King's) Most Excellent Majesty," or "To Her (His) Most Gracious Majesty." Commencement: "Madame" ("Sir"), or "May it please your Majesty," or "Most Gracious Sovereign."

Prince of Wales: "To His Royal Highness, the Prince of Wales." Commencement: "Sir", or "May it please your Royal Highness."

Princess of Wales: "To Her Royal Highness, the Princess of Wales." Commencement: "Madame", or "May it please your Royal Highness."

Princesses or Royal Duchesses: "To Her Royal Highness the Princess——."

Archbishop: Letters are addressed, "To His Grace the Lord Archbishop of ———." They commence, "My Lord Archbishop."

Dukes: "To His Grace the Duke of ———." Commencement: "My Lord Duke." Personal address, "Your Grace."

A Duke's eldest son is addressed by courtesy, by his father's second title, in all other respects as A Peer.

A Duke's younger son is addressed by his Christian name: "The Lord Charles ——," or, more formally, "The Right Honorable Lord Charles ——."

LOYALTY

If you work for a man, in heaven's name, work for him. If he pays you wages that supply your bread and butter, speak well of him, stand by him and stand by the institution he represents. If put to a pinch, an ounce of loyalty is worth a pound of cleverness. If you must vilify, condemn and eternally disparage, why, resign your position, and when you are outside, damn to your heart's content. But as long as you are a part of the institution, do not condemn it. If you do, you are loosening the tendrils that hold you to the institution, and the first high wind that comes along you will be uprooted and blown away, and probably you will never know why.—*Elbert Hubbard.*

AS THE BRITISH SEE US

A lone woman was making her first trip to America. As things happen on board an Atlantic liner, the dear thing found herself, at the end of the third day, much followed and sought by an American who was "gwon back

to God's country." He told her of the wonders of the great "Yewnited Staates," and enlarged upon the features of that country to such an extent that the lonely Englishwoman became enthralled at the thought of what she was going to see. He told her of mountains and rivers, of forests and wide plains, of Indians and cowboys and real-estate men. He thrilled her with his descriptions of the vastness, the emptiness, and the splendour of America's unknown heart. Then, at the end of the scheduled number of days, he approached her one morning on the top deck and, passing to her a pair of field glasses, said: "See here, Ma'am. Take a look through these glimmers and peep, for the first time in your life, at Long Island." She took the glasses and "glimpsed" a long, low-lying strip of land that appeared on the horizon through the mingled mists of sea and sky. She murmured: "And *that's* Long Island, is it?" The American replied: "It sure *is* Long Island." Then, taking away the glasses, she turned to him directly and, in a voice full of wonder and earnestness, asked, "And is it—inhabited?"

A JEWISH EAR FOR MUSIC

A number of Hebraic gentlemen were discussing the respective effects of different musical instruments upon their emotions. One claimed that the most inspiring music was that of the violin. "Tink," he said, "tink of th' zoft, melodiouz, zvelling zounds you get out of a mere leetel ztring." But another voted for the cornet, another for the flute, and so on, through an almost complete orchestra. Each advocate for his own pet instrument dwelt at length upon the emotional effects of music, until one of the party suddenly said that the best of all instruments was the big drum. He was chaffed and asked to explain. Strange as it may or may not seem, his explanation converted the crowd. It was: "Vy, ven I hear th' beeg drom, I am moved to the zkies by thoughts of zuccess and prosperity: for ven th' drom make th' muzic, all that I hear is just that great zound, going 'to-th'-bank, to-th'-bank, to-th'-bank-bank-bank.' There 'z real muzic for you!"

FACTS ABOUT THE EARTH

Shape and Size of the Earth: The earth is very nearly an oblate spheroid, whose shorter axis coincides with its axis of rotation passing through the two poles.

According to Colonel Clarke's calculations, its major axis measures 41,852,-124 feet, or 7,926.5 statute miles; its minor axis 41,710,242 feet, or 7,899.5 statute miles; its circumference along the Equator measures 24,902 statute miles, or 21,600 geographical miles; its total area 196,940,400 statute square miles, and its volume 259,880 million cubic miles.

Of this total area, 8.4 per cent. (16,464,700 sq. m.) are within the Arctic and Antarctic regions; 51.6 per cent. (102,244,654 sq. m.) within the two temperate regions; 40 per cent. (78,231,046 sq. m.) within the Tropics.

The Land: The land covers 54,807,420 sq. m., on the assumption that 250,-000 sq. m. of land remain to be discovered within the Arctic Regions, and that

the supposed Antarctic continent, or "Antarctis," has an extent of 2,500,000 sq. m. within the Antarctic Circle.

The Oceans: The oceans, including the inland seas connected with them, cover 142,132,980 sq. m., or 72 per cent. of the total surface of the earth. There are 2.59 sq. m. of ocean to every sq. m. of land. This area is distributed over the different areas as follows: Arctic Ocean, including Hudson Bay, 5,785,000 sq. m.; Atlantic Ocean, 34,301,400 sq. m.; Indian Ocean, 28,615,600 sq. m.; Pacific Ocean, 67,699,630 sq. m.; Antarctic Ocean, 5,731,350 sq. m.

Heights and Depths: The mean height of the land has been estimated at 2,440 feet; the mean depth of the sea, 11,470 feet (Karstans). The highest mountain (Mt. Everest) rises to a height of 29,000 feet; the greatest depth of the ocean as yet discovered (in the Pacific, between Guam and Midway) is 31,614 feet. If the whole of the solid crust of the earth were to be levelled, so as to form a spheroid, it would still be covered by an ocean of a uniform depth of 8,000 feet (Prof. Penck).

BIRTH DAYS

Monday's child is fair of face:
Tuesday's child is full of grace;
Wednesday's child is loving and giving;
Thursday's child works hard for its living;
Friday's child is full of woe;
Saturday's child has far to go;
But the child that's born on the Sabbath day
Is blithe and bonny and good and gay.

LANGUAGE OF THE FLOWERS

A cluster of flowers can be made to express any sentiment if care is taken in the selection.

If a flower is offered reversed, its original signification is contradicted, and the opposite implied.

A rosebud divested of thorns, but retaining leaves, conveys the sentiment,

AMERICAN DINNERWARE

of

QUALITY

CANONSBURG POTTERY COMPANY

"Her practised hand can smooth the way
So that the stubborn wheels go round
With soups that comfort common clay,
And pudding-lore extremely sound—
The chance of peace is much increased
By tactful feeding of the beast!"

Spaghetti á l'talienne

Cook 3 oz. of spaghetti in boiling water for twenty minutes, drain it well, and put it into a stewpan with 1 oz. of margarine. Season it with salt and pepper, and sprinkle in 3 oz. of grated cheese; stir well for a few minutes, and then add sufficient tomato sauce to moisten it; when well mixed and hot serve at once.

Novel Dessert Dish

Roast three dozen large chestnuts, peel them, and put them into a stewpan; add 4 oz. of castor sugar and half a gill of water; cook slowly till the nuts absorb the sugar, then pile them up on a glass dish, squeeze over them the juice of a lemon, and dust rather thickly with castor sugar.

Apple Ginger

Three pounds of apples (weighed after peeling and coring), 3 lb. of sugar, one and a half pints of water, 4 oz. of whole ginger, three lemons. Bruise the ginger and put it into a pan with the sugar, water, and juice of the lemons. Stir until the sugar is melted, then bring slowly to the boil. When the mixture boils, put in the apples, cut in quarters, and simmer very gently until the apples are clear, but not broken. Remove the ginger, and put the apples carefully into jars and pour the syrup over. Cover the jar either with a lid or cork, over which place a round of paper brushed over with a paste made of flour and water. If the syrup is too thin when the apples are taken out, boil it fast for a few minutes until it thickens a little.

Chestnut Cream

Boil about 1 lb. of chestnuts in a pint of milk and a gill of water. When tender skin and pound them. Whip up half a pint of cream, and after having rubbed the pounded chestnuts through a coarse wire sieve place the mixture piled in a glass or silver dish, and the whipped cream on the top, keeping it high in the centre. Garnish with crystallized cherries, or quarters of orange which have been peeled and dipped in sugar.

Macedoine of Fruit in Orange Cups

Take five Tangerine oranges, cut off a piece from the top, and remove the pulp. Chop together some pineapple, muscat grapes (with skins and pips removed), and a few preserved cherries; add some pure juice from the oranges, with a dash of lemon. Sweeten all together and serve in the orange shells.

Candied Peel

Candied peel is now so dear that it is a great economy to use the peels of oranges and lemons, the fruit of which is needed. Cut lemon or orange peel into quarters, put into strong salt water for six days. Drain, put into a pan, cover with cold water, bring to the boil, and boil till soft. Drain. Make a thin syrup by boiling 1 lb. of sugar in one quart of water, put the peel in this, and boil till it looks clear. Make a thick syrup by boiling a pound of sugar in half a pint of water till thick, put in the peel, and boil till the syrup begins to candy round the edge of the pan. Remove the peel, sift granulated sugar over, put on wire trays to drain or on a hair sieve. When dry, store in bottles or tins in a dry place.

Prune Mould

Wash 1 lb. of prunes and soak overnight; next day stew till soft with 3 ozs. of castor sugar and a few strips of lemon-peel. Take out the stones, crack them, and keep the kernels. Dissolve 1 oz. of gelatine in hot water, stir into the fruit, and sweeten to taste. Have a plain mould wetted and arrange the kernels in it; pour in the prunes and set it to cool. Turn out, scoop a hollow place in the top of the mould with a silver knife dipped in boiling water, and fill with whipped cream.

Meringues

To each white of egg allow 2 ozs. of castor sugar. Whip the egg whites till on taking the whisk the egg froth stands up in solid points, or is so stiff that it can be cut in two with a knife. Stop beating at once when this point is reached, stir in 2 ozs. of sugar to each white of egg lightly. Lay it in spoonfuls on a baking-sheet, rubbed all over with white wax. Dust them with a little icing sugar, and leave them in an oven for two or three hours, or till quite crisp and dry. The oven should just feel warm to the hand. If to be filled with cream, take them out of the oven before the bottoms are quite firm, press each of these into a hollow with the back of a spoon, then return them to the oven, bottom side uppermost this time, to dry them properly. When quite dry, put aside to cool before filling them. These meringues can be kept if packed in air-tight tins.

Hot Strawberry Soufflé

Put one and a half gills of milk and a half a gill of cream into a stewpan, let it come to the boil, and add 2 ozs. of butter and 2 ozs. of sugar; whilst boiling stir in 1 oz. of flour and ½ of ground rice, which have been previously mixed. Stir with a wooden spoon over the fire until it is thick. Let it cool, and add by degrees the yolks of three eggs. Add ½ lb. of strawberry jam, mix thoroughly if necessary, color with a few drops of cochineal; whisk the whites of the eggs to a stiff froth, adding a pinch of salt before commencing to whisk, and stir gently into the mixture, pour into a well-buttered soufflé-tin, bake for half an hour, turn out, and serve with strawberry syrup.

Salade Italienne

Cut into small dice about four cooked artichokes, and put them into the salad bowl with equal quantities of cauliflower, Brussels sprouts, and cooked haricot beans, according to what is in season, mix with these à few anchovies or olives, and season with sauce tartare.

Chestnut Salad

Put about twenty-four chestnuts in the oven and cook them until the shell and skin can be easily removed; put into a stewpan and cover with stock or water. Add an onion and boil until the nuts are quite tender. When cooked, let them get cold. Cut a head of celery into strips, chop up the chestnuts and mix with the celery in a salad-bowl. Season with salt and pepper, and pour over some mayonnaise sauce. Sprinkle with chopped parsley, and garnish with slices of hard-boiled eggs and tomato or beetroot.

Green Tomato Chutney

Two pounds of green tomatoes, two large onions, three-quarters of a pint of vinegar, ¼ lb. of raisins or dates, ½ lb. of brown sugar, one teaspoonful of ground ginger, 1 oz. of mustard seed, half a teaspoonful of cayenne pepper, and one tablespoonful of salt. Take the stalks off the tomatoes and cut them in slices. Leave them overnight with the salt sprinkled over them. Wash the mustard seeds in vinegar, dry in a cool oven, then crush them. Next morning put all the ingredients into an enamelled or aluminium pan, bring to the boil, simmer until quite tender and thick. Put into small jars and cover. This chutney need not be kept long before using.

Orange and Beetroot Salad

Divide the oranges into sections, remove the pith and pips, and arrange in the centre of the salad bowl; border with sliced beetroot. Dress with oil and vinegar (one-third vinegar to oil), salt, pepper, a pinch of sugar, and mustard, and a very little chopped parsley. Use freshly-ground black pepper.

Normandy Salad

Cut up three firm boiled potatoes, one head of well washed celery, one small boiled beetroot, and a bunch of blanched chicory; sprinkle them with a spoonful of chopped parsley, and before sending to table pour over the following sauce:

Stir well together four tablespoonfuls of cream, a small teaspoonful of salt and a little freshly ground pepper, then add—drop by drop—one tablespoonful vinegar, stirring vigorously all the time to prevent curdling.

Salade Havana

Prepare a head of fresh endive; wash and drain it and break it into shreds. Slice two small heads of well cleaned celery. Put these in a bowl with two seeded green peppers. Put two medium-sized, firm tomatoes into boiling water for a minute; then take them out and peel them, and when quite cold cut them in slices and add them to the contents of the bowl. Whisk two tablespoonfuls of cream to a stiff froth; add two tablespoonfuls of Mayonnaise, one tablespoonful of good vinegar, a small teaspoonful of salt and a saltspoonful of white pepper: whisk all together for a minute and pour over the salad. Mix lightly and evenly and serve at once.

Julienne Salad

For julienne cut into strips, as though for soup, a small head of white celery, a good-sized green pepper, and a large peeled and cored apple. The latter must be firm and sound, and preference should be given to one of tart description. Then wash a head of crisp, fresh endive, detach the leaves and break each into halves. Mix these ingredients in a salad bowl and dress them with four tablespoonfuls of Oriental dressing.

Fish Toast

Break into flakes four ounces of any cooked white fish, removing from it all skin and bone there may be; season with finely minced parsley, salt, pepper and a little mushroom ketchup or sauce. Melt half an ounce of butter in a sauce pan, add to it the fish and two tablespoonfuls of white sauce, and make thoroughly hot over the fire. Have slices of hot lightly buttered toast spread with a little anchovy paste; put the fish mixture on top and serve.

Shrimp Croûtes

Pound a quarter of a pint of picked shrimps with 1 oz. of butter and ½ oz. of anchovy paste, season with pepper. Fry some rounds of white or brown bread in butter or margarine, drain and cool. Spread one side of each croûte thickly with the preparation. Place a whole shrimp in the centre of each, garnish with parsley, and serve cold.

Fillet of Sole with Mushrooms

Have three medium-sized soles filleted, lay the fillets on a dish, rub them with lemon-juice, and sprinkle over them a little salt. Peel ½ lb. of mushrooms, cut them in two, and put them in a saucepan with 1 oz. of margarine, pepper and salt. Stir for fifteen minutes, then put aside till cool. Then chop the mushrooms finely, and lay a little on the fillets, roll up to a nice shape. When all are done, put them in a buttered pie-dish and bake twenty minutes to half an hour. Dish up, and pour a rich white sauce over them. If any mushrooms are left over, they should be added to the sauce.

Oysters Sauté

Pour a quart of boiling water over one pint of oysters; drain them and chop them fine. Melt two tablespoonfuls of butter, put them into the chafing-dish, stir in the oysters, dust with salt and pepper, and sauté until well browned. Add two tablespoonfuls of very finely crushed biscuit or toast-crumbs and three-fourths of a cup of cream. Stir all together and cook three minutes. Serve in separate cups and garnish with parsley.

Devilled Lobster

Take the meat from a lobster and sprinkle with a little pepper, chop it very finely, then add a dessertspoonful of chutney, a little melted butter, and a tomato cut up small. These must be stewed over the fire, stirring till they boil; add a little mixed mustard (French) also if available. Have ready some little squares of fried bread, put some of the devilled lobster on each, and sprinkle a little finely chopped parsley over.

Herring Roes and Mushrooms

Make some rounds of toast, season well with pepper and cayenne, on each round place half the soft roe of a herring, which has been lightly fried, and on the top of this one fried mushroom. Serve very hot. Herring roes can be bought in boxes at a good fish-mongers, or in bottles at the stores.

Sardine Eclairs

Roll some scraps of puff pastry very thin and cut into oval shapes the length of a sardine. Bone some sardines carefully, without mashing them, and lay one on each piece of pastry. Sprinkle with cayenne pepper, fold the pastry over and pinch it together, keeping it in the shape of a sardine as nearly as possible. Brush over with egg, sprinkle with pepper, and bake in the oven. Serve very hot.

Sardine Toasts

Four sardines carefully boned and minced, three yolks of eggs, 1 oz. of butter, four tablespoonfuls of thin cream, one dessertspoonful each of Worcester sauce and anchovy, and a little chili vinegar. Heat slowly, and serve very hot on fried rounds of bread.

Stuffed Fish Balls

Fillet a small sole, and cut each fillet in half length-ways. Season each with lemon juice, pepper and salt, and roll up. Place in a pie-dish with a few knobs of butter and one gill of milk, and cover with a piece of paper. Cook gently for about ten minutes. Now make the fish ball. Put one cupful of any raw fish flakes and one pint of raw, peeled, and cut-up potatoes in a pan, season, and just cover with water. Boil altogether until the potatoes are just tender, drain thoroughly, and beat well with a fork; when cool add one egg. Shape between two tablespoons and drop into smoking hot fat, fry for a few seconds until golden brown, make a cavity in the centre of each, and place a fillet of sole in the centre. Garnish with fried parsley and serve hot, either plain or on lightly fried croûtons spread with anchovy paste.

Cheese Straws

Make a paste with 6 ozs. of flour, 4 ozs. of butter, 3 ozs. of grated cheese, and as little water as possible; season it with salt, pepper, and cayenne to taste, roll it out thin, cut into narrow strips, brush over with yolk of egg, and bake in a moderate oven. Serve hot.

Devilled Almonds

Blanch about a ¼ lb. of sweet almonds, sprinkle them with cayenne pepper and a little salt, fry them in butter until a rich golden color, and put them on paper to drain well. Serve hot.

Cheese Trifles

Put some thin puff paste into patty-pans; mix 1 oz. of grated cheese, the yolk of one egg, a little salt and cayenne pepper, and a dessertspoonful of cream or milk. Whisk the white of the egg to a stiff froth, and stir it in lightly. Put this mixture in the patty-pans, and bake in a quick oven.

Imitation Pâté Foie Gras

An excellent imitation of that costly delicacy so much esteemed by all gourmets—pâté de foie gras—may be made by boiling a pound of calf's liver in slightly salted water until it is quite tender, then passing it through the mincing machine, moistening with melted butter and seasoning well with cayenne pepper, mustard, grated nutmeg, and adding a tablespoonful of water, in which have been boiled an onion and a clove. When well mixed, this should be pressed into potted meat pots, and melted butter poured over the surface. Small triangular bits of tongue or of the liver of fowls, may be inserted here and there to imitate the truffles found in the genuine Strasbourg pâtés. If well made, this mixture will keep good for weeks, and is very useful for afternoon tea sandwiches.

Banana Sandwich for Tea

Cut some white bread into rounds, butter thinly, and cover with thin slices of banana and a little sugar and lemon juice. Add a second round to complete the sandwich.

Stuffed Eggs à la Provençale

Boil four eggs hard, shell and cut them in halves lengthways. Remove the yolks, and pound them well with three boned anchovies, 2 oz. of watercress, some butter, a teaspoonful of anchovy sauce, and a pinch of cayenne. When well pounded, rub through a sieve and fill the whites with the mixture. Dish up on shredded lettuce or endive, and pour a little mayonnaise sauce over.

Vanilla Kisses

Beat up the whites of three eggs very stiffly and then add gradually four ounces of castor sugar and a teaspoonful of vanilla and mix gently together. Put a sheet of greased paper on a baking tin and put the mixture in it in small teaspoonfuls. When half of it has been used thus, color the remainder pink with a few drops of carmine. Bake in a very slow oven until hard, then remove the kisses from the paper.

Regina Biscuits

Three-quarters of a pound of fine flour, 6 oz. of castor sugar, 5 oz. of butter, the yolks of 3 eggs, orange-flower water, shredded pistachios or almonds, any good white icing.

Sift the flour into a basin; make a well in the center and put in the butter —cut into small pieces—the yolks of the eggs, the sugar and a little orange-flower water, and mix and knead until a paste of the consistency of short crust is formed. Roll out to the thickness of one-quarter of an inch and stamp into rounds and fancy shapes. Spread a thin layer of icing on each, sprinkle them with the nuts and bake in a moderate oven for about twenty minutes. While hot, brush again lightly with the icing and put them aside to set and get cool.

Moravian Cakes

Three-quarters of a pound of flour, half a teaspoonful of baking powder, 4 oz. of butter, ½ lb. of brown sugar, 2 eggs, half a teaspoonful each of ground ginger, cloves and cinnamon, one ounce of candied peel (chopped fine).

Have the flour very dry and with it sift the baking powder and the spice. Beat the butter and sugar to a cream; add the eggs, beat the mixture well and then stir the dry ingredients in lightly. Knead into a smooth dough, roll out to the thickness of one-quarter of an inch and cut into all kinds of fancy shapes.

Chicken's Liver Savoury

Pound the liver of a fowl, mix with it a teaspoonful of mustard, salt, cayenne, a little anchovy essence and a little butter; work it into a smooth paste, and spread on hot buttered toast. Place it in a very hot oven for a few minutes, garnish with parsley and serve.

THE

SIM-PLUS FOUNTAIN SHAVING BRUSH

Something new and unique in Shaving Brushes. Just squeeze a tube of your favorite shaving cream into the handle and the Brush is all set for eighty shaves.

As a gift it is unexcelled, and is always appreciated. Will not clog, and with proper care will last a lifetime. Bristles are set in rubber. Handle is made of a special metal which will not corrode nor will the finish wear off.

The Idea of a Fountain Shaving Brush is not new—one like the Sim-Plus that works is.

The messiness of the soap cake or cup, the inconvenience of opening and closing the tube each time you shave, are completely eliminated by this amazingly simple Brush, which by a turn of the handpiece feeds "just enough" cream for one shave into the Brush.

How Wanamaker Handles Credit

In the Tube Room at John Wanamaker's (New York City) are RAND "Traco" Cabinets with capacity for 200,000 credit cards. The names are thus at the very finger-ends of those in charge of the system,—the credit of the customer can be passed on without a moment's delay.

Credit installations are made by RAND by means of a special Installation Dept. No new help necessary, none of the worries and losses resulting from business interruptions—RAND installs and turns over the system in working order, *complete.*

RAND

VISIBLE BUSINESS-CONTROL

On request we will gladly have a Rand Salesman call and show you how Rand Equipment will help your Credit Dept.

White Mountain Refrigerators

"THE CHEST WITH THE CHILL IN IT"

For more than forty years WHITE MOUNTAIN refrigerators have been famous all over the world for durability, beauty and ice economy. With their perfect circulation and insulation, supplemented by our "solid end" construction, the "ice saving" qualities are this year more marked than ever before.

Food kept in a White Mountain Refrigerator comes to the table free from foreign odors and tastes because the White Mountain scientific construction insures right refrigerating temperature—and the dry air circulation which is so essential.

CONCERNING THE HISTORY OF SILK

Did you ever stop to think how ancient a fabric silk is? Who first discovered that the glossy filaments of the unraveled cocoon could be woven into a shining web for apparel? Tradition answers that it was the Empress See-ling-shee of China. The written records of the Chinese Empire are said to describe the treatment of silk 2,700 years before the Christian era. It seems certain that the Greeks obtained their knowledge of silk from the Chinese. Aristotle includes it among the discoveries in natural history made during the conquests of Alexander the Great, and gives a minute description of the silkworm. Yet so jealously did the Chinese guard their stock of silkworms that for ages the origin of the silk fabrics imported into Greece and Rome was a matter of conjecture, it being supposed by some that silk was made from flowers or from the barks of trees.

In Rome it was at first considered effeminate for men to wear silk, and for two hundred years after the age of Pliny its use was confined to women. Heliogabalus was the first man in later times to wear a garment composed wholly of silk. The price of the material was prohibitive, a pound of silk being sold at Rome in the third century for its weight in gold.

About three hundred years later the whole silk trade was revolutionized by the visit of two Persian monks to China. "There, amidst their pious occupations, they viewed with a curious eye the common dress of the Chinese, the manufactures of silk, and the myriads of silkworms, whose education either on trees or in houses had once been considered the labor of queens. They soon discovered that it was impracticable to transplant the short-lived insect, but that in the eggs a numerous progeny might be preserved and multiplied in a distant climate." After describing the patronage given to the monks by the Emperor Justinian, and their return to China to procure the eggs, the chronicler goes on: "So a careful of the eggs of an Oriental insect became the means of establishing a manufacture which fashion and luxury had already made important, and of saving vast sums annually to European nations, which in this respect had been so long dependent on and obliged to submit to the exactions of their Oriental neighbors."

From that time the silk industry spread rapidly through Persia and the whole of the Byzantine Empire, and in 1130 Roger of Sicily brought some silk manufacturers from Corinth and established them at Palermo. The Sicilians soon bettered their instruction, and ran Greek silk out of the market. The Venetians, who had been the chief importers of Oriental silk, went to war with Sicily on this account. But Palermo silk throve in spite of this, and in self-defense Venice took to the silk manufacture herself, and by the thirteenth century had acquired unchallenged supremacy in it. Silk-weaving, glass-blowing and drug-compounding were the three trades in Venice held not to be derogatory to gentle blood, and the nobility could engage in them without degradation.

Silk was first manufactured in England in the reign of Edward III. The "mystery of silkwomen" was protected in 1455 by an Act of Parliament.

France established her silk culture in 1564, when the first nursery of white mulberry trees was planted at Nismes.

WEATHER WISDOM

Sunset Colors.—A gray, lowering sunset, or one where the sky is green or yellowish-green, indicates rain. A red sunrise, with clouds lowering later in the morning, also indicates rain.

Halo (Sun Dogs).—By halo we mean the large circles, or parts of circles, about the sun or moon. A halo occurring after fine weather indicates a storm.

Corona.—By this term we mean the small colored circles frequently seen around the sun or moon. A corona growing smaller indicates rain; growing larger, fair weather.

Rainbows.—A morning rainbow is regarded as a sign of rain; an evening rainbow of fair weather.

Sky Color.—A deep-blue color of the sky, even when seen through clouds, indicates fair weather; a growing whiteness, an approaching storm.

Fogs.—Fogs indicate settled weather. A morning fog usually breaks away before noon.

Visibility.—Unusual clearness of the atmosphere, unusual brightness or twinkling of the stars, indicate rain.

Frost.—The first frost and last frost are usually preceded by a temperature very much above the mean.

Fashionette
Invisible HAIR NETS

Have You Tried That New Coiffure?

THE pretty styles of hair dressing that you admire in the theatre or in pictures are not hard to equal if you use a Fashionette.

Of course, your hair will be rebellious the first few times you try to train it in a new fashion, but just slip over it a Fashionette Invisible Hair Net, catch it loosely with tiny hair pins, and the most difficult coiffure becomes a simple matter.

Fashionettes match every shade of hair and are made in shapes that preserve the naturalness of every style of coiffure.

Usual shades—15c each—2 for 25c. White or grey—30c each.

HAMMOND'S POCKET ATLAS OF THE WORLD

Owners of larger and more cumbersome atlases often have occasion to use a small pocket edition. Here is just the atlas for the man or woman who cannot take the time to refer to a larger atlas. Our Pocket Atlas of the World is the latest and most satisfactory work of its size published. It is only 4 by 6 inches in size.

The maps in this new atlas show the world just as it is to-day with all of the new states and other changes brought about by the World War and the Peace Conference. It also includes a new ready-reference index which names and gives the 1920 census figures for every city and town with a population of 1,000 or more as well as a list of the principal countries and cities of the world with their latest available population.

The atlas is neatly bound in stiff cloth cover with attractive cover design.

Price, $0.75 per copy

Write for our General Catalog of Maps and Atlases for other recent publications.

OPEN THE YEAR 'ROUND

"For all the world is but a theatre
Outside whose walls, where shine the stars of heaven,
The actors with their roles and robes laid by
May all meet smiling in the open air."
